## RAILEOAD TALK AGAIN.

New Berlin Gazette without comment, except to say that we hope it may be true :

The visit of Dr. Lewis Morris and party to this place last Sunday, mentioned in our personal column, had in it a possibility of more than ordinary significance. Dr. Mormore than ordinary significance. Dr. Morris was spending a few days at his old home near Morris village. We understand that he has bought the old manor property which is to be greatly improved, and that its owner is likely to spend some part of each summer there. Dr. Morris becomes, by his marriage to the youngest daughter of Senator Clark of Montana, a brother-inlaw of Dr E. M. Culver. president of the Wm. Carpenter, of the fown of Pitts field. Otsego county, got a check cashed belonging to his son-in-law, Harlan Chapin, and left for parts unknown with \$220 of Chapin's money.

Our first rain in two weeks came in a terrific thunder shower last Thursday afternoon, when the rainfall was 1½ inches in about twenty minutes. In the evening it rained a quarter of an inch more.

Mrs. R. R. Ripley and son Alden are money relatives in the solf and relative to the control of the U. V. and through Morris to Oneonta, where it would connect with the D. & H. and also the Ulster & Delaware, which is just finishing an extension to that place.

We do not think we are saying too much when we predict that there is a fair prosecoing four years. The milk producers' organization was probably a cause for the increase.

E. M. Sloan sells the paint that wears twice as long as lead and oil—Devoe lead and zinc, ground by machinery.

WANTED—An industrious man of good habits, to work on Maple Lawn Stock Farm. Steady employment for satisfactory man.

Letter to Samuel Monroe, Morris, N. Y. Dear Sir Lead and oil is no longer the

paint to be prosperous with. As everybody knows, lead and oil chalks or powders off in about three years-three

ears is its limit. Painters are putting a little zinc in their lead to make it tough-it lasts a good three vears with a little zinc.

But painters don't like the job of mixing zinc. It's a tedious job, and, both being white, nobody knows when the mixing is thorough. It gets half-mixed, voted to build an iron bridge across the and the paint goes on, a streak of lead and a streak of zinc. That is not good work

The mistake made is in trying to do by hand what is better done by machinery. Hand-work can't compete with machine-
